NEA-New Mexico Jump Start is the ideal way to start the National Board Certification journey.

This three-day workshop, taught by National Board Certified Teachers, is designed to familiarize new candidates with the rigorous process of certification. Participants will become familiar with the foundation, components, and requirements of certification, and they will leave better prepared to succeed in the process.

NEA New Mexico’s CAPP Philosophy:
We believe that New Mexico teachers, as Professionals, are the key to student success in our state. As Professional Practitioners, teachers continually hone their skills. We believe the best professional learning occurs when the needs of students are identified by teachers in collaboration with colleagues, administrators, community members, and the students themselves. We believe that districts and school buildings should rely on the expertise of their own outstanding educators to deliver professional development in collaboration with their colleagues. The Center for the Advancement of Professional Practice seeks to work with these educators to support their needs to promote effective teaching in their schools.
