NEA-New Mexico's Virtual Jump Start is the ideal way to start your National Board Certification journey.

This three-day virtual workshop, taught by National Board Certified Teachers, is designed to familiarize new candidates with the rigorous process of certification. Participants will become familiar with the foundation, components, and requirements of certification, and they will leave better prepared to succeed in the process. Participants will also become familiar with virtual learning tools to support distance learning in their own classes during this challenging year. Trainings will take place on Saturdays: Aug. 29th, Sept. 5th, and Sept.12th. It is essential to attend all three days.
