NEA-President: We Didn't Just Survive, We Grew Stronger

"We learned. We grew. We questioned and we answered. We didn’t just make it through. We lifted up our voices and we took action in ways that demonstrated our individual and collective power." - NEA President Becky Pringle
School Board Elections Matter

November school board elections are around the corner, November 2nd to be exact. NEA-NM is here to provide your local with the skills set to make sure we elect the right candidates to our school boards. It’s never too early to get involved especially when school boards play such a critical role in setting up our students learning conditions and educators working conditions.

For this reason, NEA-NM has released the 2021 School Board Elections Handbook. This handbook is designed to help your local set up a complete candidate screening and recommendation process, develop a campaign plan, craft a student-centered message and launch a social media campaign. While the given political landscape is an important factor in any campaign, in many cases the most important factor is how we organize members to build local power, use that power to get out the vote and elect the right candidates to our school boards. Use the link below to request a copy of the 2021 School Board Elections Handbook.

Member Summer Resources

NEA is proud and excited to partner with Public Broadcasting’s WETA-TV to provide a host of Summer Resources, including:

- Reading Intervention Guides
- Resources for Educating ELL Students
- Reading 101

More Opportunities

"As the National Education Association has consistently said, there is no substitute for in-person learning, and we look forward to all students returning to school in the fall. The CDC’s latest guidance provides an important roadmap for reducing the risk of COVID-19 in schools. And it is up to all of us in communities across the country to make it possible for all school buildings to be fully open, to stay open, and for all students, staff, and families to remain healthy..."
