Take Bold Action!

In this upcoming 2022 legislative session, NM legislators will be working to transform our public schools by delivering the equitable and quality public education all students deserve. Legislation can—and should—include NEA-NM priorities. We know educators across the state have taken a beating during the pandemic and education policy must include better pay, affordable healthcare for educators, manageable class sizes, time for planning and above the line funding for Community schools.

Take action now! Write your legislators and ask your friends and colleagues to do the same. Together we can transform our public education system!
Let’s speak out and take bold action now!
